NIH Concerns

- ① expedited review process - 6mo ~~del~~-award
neg w/ Committee
- ② priority requests for personal & space
to only one institute - Javici
- ③ AIDS research program for all NIH
in Allergy Institute & director makes
decision - director should not
be administering other agency's programs
but believe research program &
coordination in Allergy Institute
→ NIMH research would not be involved
- ④ NIH Advisory Council in Allergy Institute
w/ members appointed by Secretary -
believe if for all NIH should be
under Director
