TO: Members of the Informal Steering Committee  
on Prescription Drug Abuse

FROM: Bonnie B. Wilford *BBW*

SUBJECT: Report of the Steering Committee Meeting of July 21, 1983

-----

Attached you will find a summary report of the Committee's July 21st meeting in Washington, D.C., as well as copies of informational materials distributed at that meeting.

Also part of the report are notes of the work group meetings scheduled around the meeting of the full Steering Committee, as follows:

Work Group on PADS	Tab F
Work Group on Professional Education	Tab L
Work Group on Patient/Public Education	Tab M
Work Group on Legislation	Tab Mc
Work Group on Research	Tab N

The next meeting of the Steering Committee is scheduled for Thursday, February 2, 1984, in Washington, D.C. At that meeting, most of the work groups will present drafts of their primary projects for Committee review.

Your continued participation in the work of the Steering Committee is vital to our continued success. As always, do let me know whenever I can be of assistance to you.

C

PROJECTS APPROVED AT THE MEETING OF JULY 21, 1983

Inter-Professional Coordination at the State Level

Scheduling of state-level interdisciplinary conferences to engage in coordinated problem identification and development of strategies for remediation.

TARGET: 10 conferences in 1983; 10 more in 1984 (5 held in 1982)

Development of written guidelines for states on how to organize state conferences and task forces, based on experience gained to date.

TARGET: January 1984 (draft information available now)

Diversion Detection

Completion of the PADS (Prescription Abuse Data Synthesis) field test in at least three states, followed by post-test evaluation and revision of the model.

TARGET: November 1983

Implementation of PADS in 15 states.

TARGET: November 1984

Legislation

Preparation of a model bill/executive order establishing an interdisciplinary task force at the state level to identify problems and recommend solutions.

TARGET: January 1984

Development of a legislative "checklist" for use by states in determining whether all legal elements necessary to diversion detection and control are in place.

TARGET: April 1984.

Professional Education

Development of a pharmacist education program (videocassette/text/instructor's guide) on dispensing of controlled substances.

TARGET: October 1983

Development of a physician education program (videocassette/text/instructor's guide) on special considerations in prescribing controlled substances.

TARGET: January 1984

Patient Education

Identification of key learning objectives for patient education; compilation of currently available program materials for patient education; selection of suitable material for wider dissemination.

TARGET: June 1984

Research

Evaluation of commonly employed diversion control methods (i.e., multiple prescription systems, controlled substances boards, peer review, diversion investigation units) to assess comparative costs, effects on drug distribution and consumption, morbidity and mortality, and professional practice.

TARGET: November 1984

D

SUMMARY OF ACTIONS

<i>AGENDA ITEM</i>	<i>ACTION</i>	<i>REFER TO:</i>
II A	<p>The PADS Work Group reviewed the status of the field tests under way in Florida, Michigan, Massachusetts, Nevada and Arkansas, and found that the model is performing well. Barry Rhodes, technical consultant for PADS implementation, noted the excellent level of cooperation in the field tests by the DEA Office of Diversion Control and field offices, and commented that the development by DEA of several new data analyses and graphic displays have considerably enhanced PADS implementation.</p> <p>Frank Nelson, Director of the Florida Drug Abuse Program, and Joseph H. Deatsch, M.D., of the Florida Medical Association, commented on the high level of cooperation among government agencies and between government and the private sector engendered through the PADS field test.</p> <p>Neil Foley, of the Massachusetts Medical Society, discussed the prescription drug abuse problem in Massachusetts and the interest of the medical society in the PADS field test.</p> <p>Sherry Wellman, of the Michigan State Medical Association, and Ken Eaton, representing the Michigan Office of Substance Abuse Services, described new programs in Michigan that should be complementary to the PADS field test.</p> <p>In response to a request from the PADS Work Group for assistance in making contact with all interested professional organizations in the PADS test states, members of the Steering Committee offered to send information on PADS to their state affiliates in advance of the first PADS meeting in each state. Bonnie Wilford will provide Committee members with a tentative schedule of PADS site visits and a brief brochure describing the PADS model.</p>	<p>Tab F</p> <p>Tab G</p> <p>Tab E</p>
II B	<p><u>Kansas</u> Bonnie Wilford reported on the state drug abuse conference, sponsored in April 1983 by the Kansas Medical Society and the Kansas Alcohol and Drug Abuse Services Department. Approximately 650 health care and treatment personnel registered for the conference, and about 120 attended the workshop on prescription drug abuse.</p>	Tab H

*Informal Steering Committee on Prescription Drug Abuse  
July 21, 1983, The Watergate Hotel, Washington, D.C.*

AGENDA ITEM

ACTION

REFER TO:

- II B      Connecticut Bonnie Wilford reviewed plans for a state conference and described the central coordinating role of the Connecticut Alcohol and Drug Abuse Commission.      Tab I
- Ohio Mike Bateson, of the Ohio Medical Association, discussed plans for inter-professional activities in the state and expressed strong interest in scheduling PADS implementation at an early date.
- Colorado Thomas Vernon, M.D., of the Colorado Department of Health, described the results of a preliminary consensus meeting held in May 1983, as well as research into prescribing issues undertaken by his office in coordination with the Colorado Board of Pharmacy.
- Missouri Ed Corcoran of the Missouri Department of Mental Health reviewed activities undertaken by the Missouri Task Force on Prescription Drug Abuse, Misuse and Diversion in the year that has elapsed since the July 1982 state conference.      Tab J
- Wisconsin Dave Joranson reported on the May 1983 consensus conference sponsored by the Wisconsin Controlled Substances Board.      Tab K
- II C      Jim Callahan, of the National Institute on Drug Abuse, described a joint program undertaken by NIDA with the National Board of Medical Examiners to develop questions on drug abuse for the Modular Examinations prepared by NBME. Jim suggested that it might be possible to add several questions on prescribing issues to the examinations.      Attached booklet
- Bill McGivney, Ph.D., of the AMA staff, reported on the July 19 meeting of the Professional Education Work Group. Bill described the educational program for pharmacists being developed by the National Association of Boards of Pharmacy and reported the work group's recommendation that a similar program be developed for physicians. This proposal was accepted by the Committee, and the work group will proceed to develop such a project.      Tab L

*Informal Steering Committee on Prescription Drug Abuse  
July 21, 1983, The Watergate Hotel, Washington, D.C.*

AGENDA ITEM

ACTION

REFER TO:

- II G                    During an open discussion of program development recommendations, Dick Penna suggested that a new work group be established to prepare written guidelines for the states on how to organize a state conference and/or task force. The committee members concurred in this suggestion.                    Tab E
- III                    National Association of State Alcohol and Drug Abuse Directors Tom Kirkpatrick, President of NASADAD, explained that organization's current goals and activities, and highlighted areas of cooperative action with the Steering Committee. For example, the 1983 NASADAD Annual Meeting featured a program track on prescription drug abuse and the association is working with the Steering Committee on a survey of state drug abuse agency directors. Also, the NASADAD Board of Directors has formally endorsed the committee's PADS project and state conferences, and is encouraging the NASADAD membership to cooperate in these initiatives.                    Tab O
- Alcohol and Drug Problems Association Eric Scharf, Assistant Director of ADPA, described the membership and goals of that organization, which represents the professional treatment community. ADPA's 1983 Annual Meeting in August will feature a 10-hour program track on prescription drug abuse, prepared in cooperation with AMA and members of the Steering Committee.                    Tab P
- National Governors Association Nolan E. Jones, Staff Director with the NGA, discussed a recent report on "Illegal Drug Trafficking in the United States," prepared by NGA and the National Criminal Justice Association. Mr. Jones described areas of activity by NGA that are complementary to the work of the Steering Committee, and expressed interest in further exploring these mutual interests.                    Tab Q

*Informal Steering Committee on Prescription Drug Abuse  
July 21, 1983, The Watergate Hotel, Washington, D.C.*

AGENDA ITEM

ACTION

REFER TO:

III

Department of Health and Human Services, Office of the Inspector General Michael Nelson, M.D., Medical Advisor to the Inspector General, described the findings of a detailed examination of drug diversion and abuse financed through the Medicaid system and discussed proposed remedies now under consideration.

American Society of Hospital Pharmacists Dr. S. Albert Edwards discussed the problem of prescription drug diversion as experienced in hospital pharmacies and expressed the interest of ASHP in continuing to work with the Steering Committee.

Quota Reduction Initiative Robert Weiss, Prosecuting Attorney for Genessee County, Michigan, described the gravity of the prescription drug diversion and abuse problem in his jurisdiction and suggested that reduction of production/importation quotas for controlled drugs might be one approach to curtailing the problem. Tom Gitchel of the Drug Enforcement Administration provided a brief review of how quotas are established and amended. After considerable discussion, members of the committee agreed that, while quotas are an important factor in the control of prescription drug distribution, diversion will continue to be a major problem until the sources of leakage from legitimate channels of distribution are found and corrected.

IV

In a closing discussion period, the committee expressed consensus that many of the projects now under way should be targeted for completion by January 1984, so that a comprehensive package of resources can be offered to the states (to include PADS, professional education, legislation, and organizational guidelines).

The next meeting of the full Steering Committee will be scheduled for early 1984 to allow the members to review the projects before they are announced to the public.

STAFF NOTE: FOLLOW-UP ACTIVITIES

AGENDA ITEM

ACTIVITY

- II A Schedule for future meetings of PADS Implementation Teams (technical personnel) and Policy Groups (policy-making personnel) in the field test states:

STATE	MEETING WEEK OF:
Michigan	August 15, 1983
Florida	August 23, 1983
Arkansas	September 5, 1983
Nevada	September 12, 1983
Massachusetts	September 19, 1983

(See attached PADS descriptive brochure; contact Bonnie Wilford for extra copies.)

- II G The new Work Group on State Programs will hold its first meeting August 31, 1983, in Washington, D.C. Members are:

Ken Beacham, American Dental Association  
Ed Corcoran, Missouri Department of Mental Health  
Joe Gloyd, American Veterinary Medical Association  
Dave Joranson (chairman), Wisconsin Controlled Substances Board  
Dick Penna, American Pharmaceutical Association  
Bonnie Wilford, American Medical Association  
DEA representative

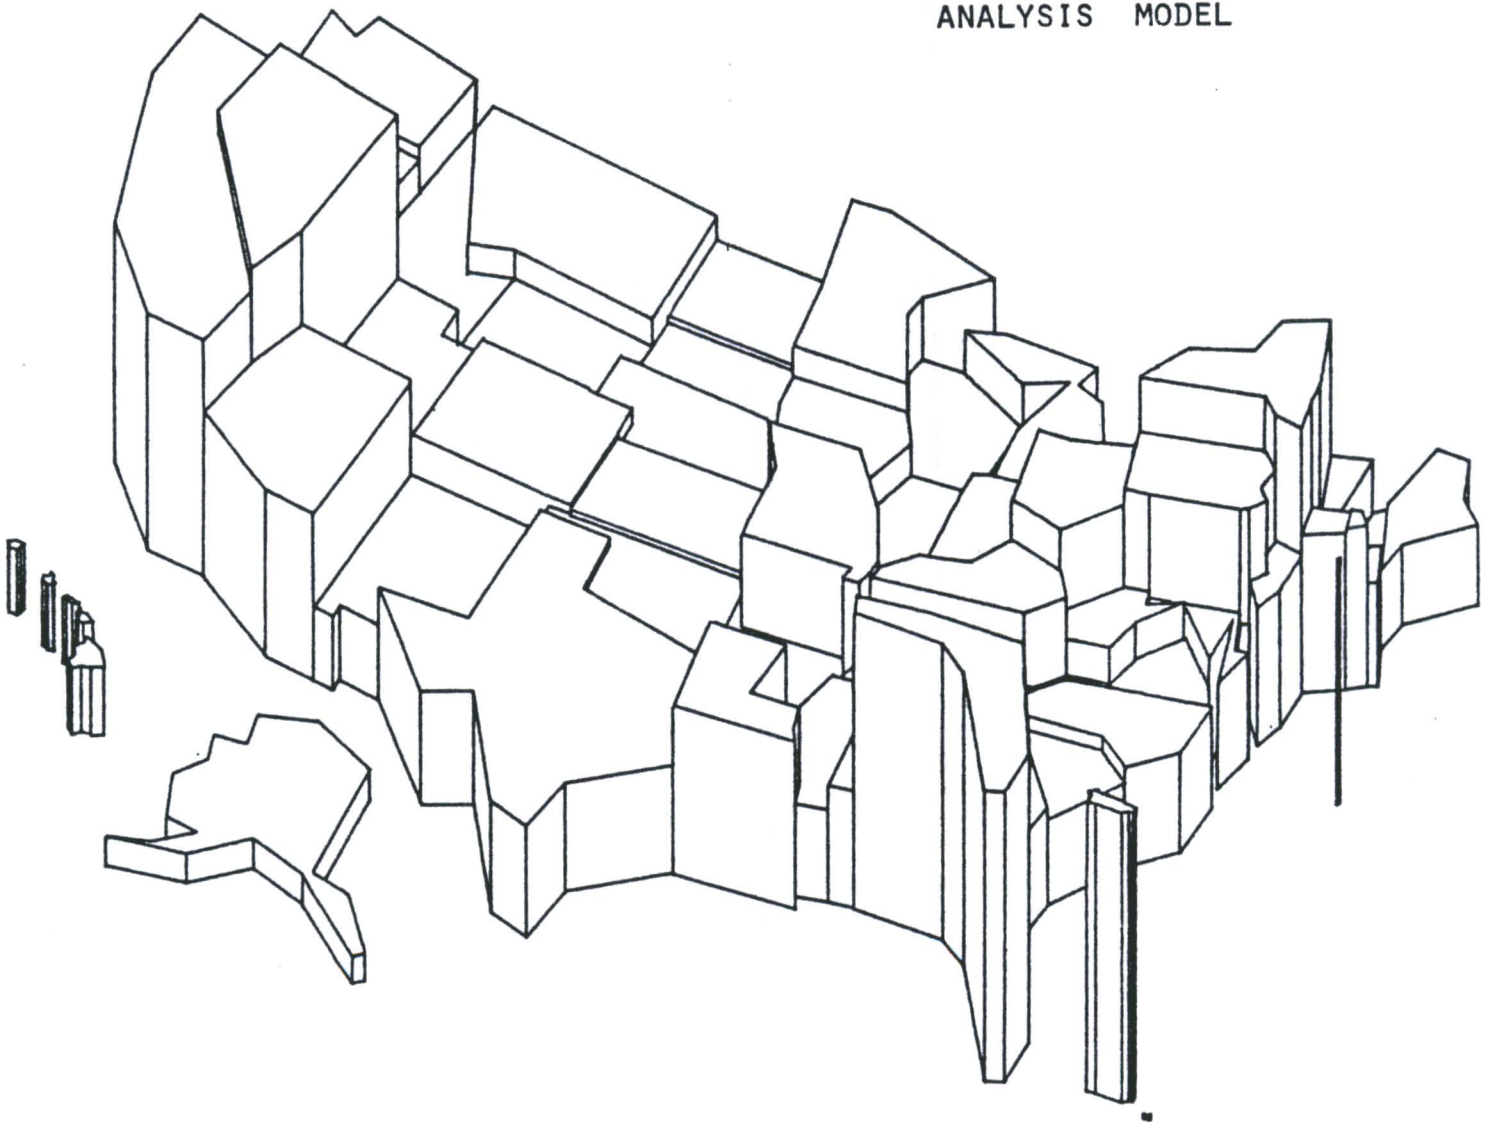

The target for producing written guidelines on how to organize state-level programming is January 1984.

- IV The next meeting of the full Steering Committee will be Thursday, February 2, 1984. Meetings of the various work groups will be scheduled on Tuesday and Wednesday, January 30 and 31.

PRESCRIPTION ABUSE  
DATA SYNTHESIS (PADS)  
DATA INTEGRATION AND  
ANALYSIS MODEL

A PROJECT OF THE  
INFORMAL STEERING COMMITTEE  
ON PRESCRIPTION DRUG ABUSE

*Copyright 1983,  
American Medical Association*

PROJECT: Prescription Abuse Data Synthesis (PADS) data analysis model.

SPONSORSHIP: The PADS model has been developed by the American Medical Association in support of an objective formulated in June 1982 by the Informal Steering Committee on Prescription Drug Abuse.

PARTICIPATION: PADS has been designed by a team of experts from state drug abuse and enforcement agencies, in collaboration with the federal Drug Enforcement Administration and staff of the AMA. A working draft of the model has been presented to officials of state medical societies, other health professional organizations, regulatory and enforcement agencies for their review and comment.

GOALS: PADS is intended to help state officials identify the precise nature, magnitude, locus and source of prescription drug diversion and abuse within their jurisdictions.

BENEFITS: Use of PADS will help states curtail prescription drug abuse by identifying the sources of drugs diverted to illicit use, rather than focusing only on the drugs that are the objects of such abuse. This approach is based on experiential evidence that, while preferences in specific drugs of abuse tend to change over time, the sources of those drugs remain relatively constant unless source-specific intervention efforts are applied.

Careful integration and analysis of data presented in the PADS model will allow state authorities to target suspected sources of abused drugs. Thus, manpower resources can be focused on investigating specific problems identified by the system, rather than on routine screening work.

PADS also is useful in assessing the impact of intervention efforts and monitoring the effectiveness of programs to control prescription drug diversion and abuse.

Use of the PADS model does not require states to invest in additional computer hardware or software programs, and should not involve significant expenditures of staff time.

DESCRIPTION: The PADS concept is described in a written document that explains how to use integrated data to identify prescription drug diversion and abuse activities at the state level. The model, which is based on sophisticated data analysis systems now in use in several states, employs information currently available from national, state and local sources.

The PADS document describes the source and use of each type of data employed in the PADS model in terms of the data's availability, frequency, strengths, limitations and analytic potential. Further, the document describes how the various types of data can be integrated into a comprehensive analytic tool to answer the following questions:

- o Is there a drug diversion/abuse problem in my state?
- o Is that problem contributing to drug-related morbidity and mortality?
- o In what substate areas is the problem occurring?
- o What drugs are involved?
- o What are the sources of the diverted drugs?
- o What are the prescribing/dispensing patterns of practitioners, pharmacies or other institutions targetted as possible sources of diversion?
- o Have intervention efforts with those sources resolved the diversion problem?

The PADS model will be made available to state officials by the American Medical Association, at no cost to the states. Technical assistance in implementing the model will be provided by the American Medical Association and the Informal Steering Committee on Prescription Drug Abuse.

SCHEDULE:

Estimated target dates for development of the PADS model are:

1. Identification, collection and evaluation of data (target: November 30, 1982) ON SCHEDULE
2. Preparation of a draft PADS document (target: January 30, 1983) ON SCHEDULE
3. Review and revision of the draft document by the Informal Steering Committee on Prescription Drug Abuse and other consultants (target: March 30, 1983) ON SCHEDULE
4. Testing the performance of the model in three states (target: November 30, 1983)
5. Formal presentation of the PADS model to officials of state agencies and professional associations (target: January 30, 1984)
6. Technical assistance to states that wish to implement the PADS model (target: November 30, 1984)

NOTE: These steps will be accompanied by ongoing evaluation of PADS performance in the states and refinement of the model as needed.

FOLLOW-UP:

In other projects, the Informal Steering Committee on Prescription Drug Abuse is addressing the range of activities that logically would follow identification of an individual or institution as a source of prescription drug diversion and abuse. These activities involve enforcement actions (such as licensure or criminal justice proceedings), early intervention (followed by rehabilitation or reeducation), and prevention (such as primary and postgraduate professional education and broad-based public education programs).

Notes

PADS WORK GROUP

Washington, D.C.

July 19, 1983

Al Russell (Chairman), Drug Enforcement Administration  
Dave Joranson, Wisconsin Controlled Substances Board  
Barry Rhodes, Odyssey Resources, Inc.  
Ernie Sjoblom, Missouri Bureau of Narcotics and Dangerous Drugs  
Bonnie Wilford, American Medical Association

I. PADS Field Test

Barry Rhodes reported that the model is performing extremely well in the test states, although some minor modifications of the inventory pages may be needed. State agency and professional organization officials in Florida and Michigan are very pleased at the level of communication established through formation of the PADS Implementation Team (PIT). Political and "people" problems have been encountered at several points in the test process, but no more than were anticipated by the group during the design of PADS, and all have been successfully resolved. The group agreed that technical assistance (on-site and off-site) is key to successful implementation of the model, from both the technical and political/organizational perspectives.

Bonnie Wilford reported that the pace of inquiries about PADS is increasing and that a list of good prospects for implementation after the field test phase now numbers about 15 states. The group agreed that it would be desirable to implement PADS in at least 15 states in 1984, if that can be accomplished with an acceptable level of technical assistance.

The group agreed to ask the Steering Committee members to work with their affiliate organizations in the PADS states to inform them of the project and ask their support.

II. New ARCOS Reports

Al Russell described the new ARCOS quarterly report formats for the standard deviation reports (registrant level) and provided samples of recently developed graphic displays of ARCOS data. The group agreed that, in many instances, these displays will be more useful than the topographic maps because they are quicker and less expensive to produce.

Al also reported that DEA Regional Office representatives for every PADS field test state have been extensively briefed on the

PADS concept. Barry Rhodes confirmed that the DEA agents he has encountered have shown understanding of and support for the project, which has been very helpful.

III. Trend Reports

Ernie Sjoblom provided copies of six-year state trend reports prepared for his office from the ARCOS annual reports. Bonnie Wilford noted the usefulness of these reports in meetings with state officials to discuss specific diversion problems at the state level.

IV. Next Meeting

The group agreed to reconvene when the PADS field test and post-test evaluation reports have been completed (December 1983). At that time, the model can be "fine-tuned" and an assessment of its performance to date can be prepared for the full Steering Committee.

REPLY TO: Alfred A. Russell, Chief  
ATTN OF: Regulatory Support Section, DEA

SUBJECT: DEA Computer Generated Graphics

TO: Ms. Bonnie Wilford  
American Medical Association

JUL 5 1983

HEALTH & HUMAN BEHAVIOR PROGRAM

I am enclosing eight bar graphs and one pie chart as examples of the type of computer capability which DEA now has in my Section.

Six of the graphs depict the per capita consumption of selected drugs of the top ten states and compares that to the national per capita consumption for each drug. One graph is a comparison of the New York City zip areas for three years against the national value and one compares the State of Michigan vs. U. S. per capita consumption. The pie chart is an attempt to show the relative distribution of selected drugs into the Detroit area compared with the rest of the State of Michigan.

I am sending these to you merely as examples of what can be done in a primary analysis by computer through use of ARCOS data.

Office of Substance Abuse Services

Lansing, MI

VOL. 4, NO. 3

SUMMER, 1983

## Michigan Prescription Drug Task Force Called For

A Macomb County committee of doctors, pharmacists and government representatives has asked that a State Prescription Drug Abuse Task Force be appointed. The committee (known as the Macomb County "Mop Up" Committee) presented their report on prescription drug diversion to the State Board of Pharmacy on June 28, recommending appointment of a task force to address seven major problems related to prescription drug abuse and diversion.

The Mop Up Committee is a joint committee of the Macomb County Dental, Medical and Osteopathic Societies and the pharmacists and podiatry associations, with the Macomb County Office of Substance Abuse Services, the Michigan Center for Continuing Education in Osteopathic Medicine, and the U.S. Drug Enforcement Administration.

After examining the prescription drug abuse problem for 18 months,

the Committee stated they "are convinced that the problem in Michigan is both serious and in need of statewide attention and action."

Michigan is presently one of the centers of prescription drug diversion and abuse in the United States. Figures from the U.S. Drug Enforcement Administration show that Michigan has become the number one state in per capita consumption of desozyn and preludin (stimulant drugs) and dilaudid (a narcotic pain killer); second in per capita consumption of methaqualone and codeine; and in the top ten per capita consumption of all Schedule II drugs. While consumption of many of these drugs has decreased in the rest of the United States, it has increased as much as 285 percent for dilaudid in Michigan since 1978.

Cited by the Committee as a substantial portion of the problem in Michigan is a small number of

doctors and pharmacists who are misusing the prescription and dispensing privilege granted them. They point out that profit is enormous and demand is great, while the likelihood of being detected and successfully prosecuted is minute.

The seven major problems related to prescription drug abuse diversion which the Mop Up Committee recommended be addressed by the State Task Force are: (1) lack of coordination of present activities against prescription drug abuse; (2) the uncontrolled printing of prescription blanks; (3) the lack of a monitoring system to identify unethical/illegal prescribers; (4) insufficient resources for investigating and bringing action against those prescribers; (5) insufficient professional education about drug abuse; (6) weak communications about licensing actions against drug diverters; and (7) insufficient involvement and interaction by professionals at the local level.

Solutions identified in the Committee's report to be considered by the Task Force were: (1) a controlled

substance board; (2) state controlled prescription blanks; (3) suggestions for identifying illegitimate prescribers; (4) committing greater resources to law enforcement and licensing actions; (5) strengthening medical education on drug abuse; (6) suggestions to increase communications; and (7) setting up inter-association committees like the Macomb County Mop Up Committee throughout Michigan.

In response to the Committee's recommendations, Governor James Blanchard has asked Dr. Robert Brook, administrator of the Office of Substance Abuse Services, and Elizabeth Howe, director of the Department of Licensing and Regulation, to work together to coordinate the efforts of their agencies and the affected professionals to develop a strategy for identifying, investigating and providing sanctions against indiscriminate, unethical and illegal prescribers.

For more information, contact Dan Reeves, Office of Substance Abuse Services, P.O. Box 30035, Lansing, MI 48909 or (517) 373-4122. ■

# A STATEWIDE ALCOHOL/DRUG ABUSE CONFERENCE FOR PROFESSIONALS . . . .

## PURPOSE

A state-wide conference for the purpose of educating Kansas professionals on the prevention, intervention and treatment of alcohol and other drug abuse problems.

## CONFERENCE OBJECTIVES

1. understand the concept of prevention
2. recognize symptoms of abuse
3. know confrontational techniques and referral sources in the state
4. understand the role of other professionals in dealing with alcohol/drug abuse problems.

## PRIMARY SPONSORING ORGANIZATIONS

The Kansas Medical Society  
Kansas Department of Social and Rehabilitation Services, Alcohol and Drug Abuse Services

## CO-SPONSORING ORGANIZATIONS

Kansas Pharmacists Association  
Kansas Medical Society Auxiliary  
Kansas Bar Association  
Kansas Association of School Health  
Mental Health Association of Kansas  
Kansas Association of Broadcasters, Inc.  
Kansas Alcohol/Drug Program Directors Association  
Kansas Alcoholism Counselors Association  
Kansas Association of Drug Abuse Counselors  
Kansas Chapter - National Association of Prevention Professionals  
Kansas Hospital Association  
Kansas Department of Education  
Kansas Department of Health and Environment  
Kansas Department on Aging  
Kansas Department of Transportation  
Salina Area Chamber of Commerce  
Salina Citizens' Coalition on Alcohol and Drug Abuse  
Kansas Citizens Advisory Committee on Alcohol and Other Drug Abuse

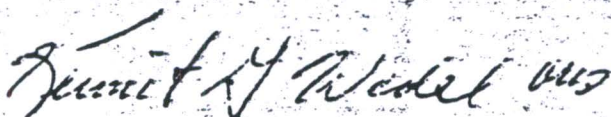

## WELCOME . . . .

The comprehensive framework of this conference provides for the much-needed sharing of information among the various professionals who in some way impact on the illness of alcohol/drug abuse.

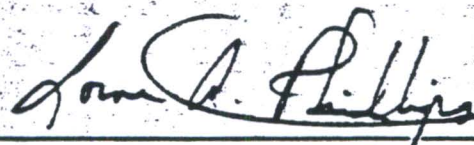

Usually, the physicians talk with physicians, nurses with nurses, public health specialists with sociologists and political scientists, and some professionals, in their splendid isolation, talk with themselves. But all dimensions of the health professions are represented in this meeting: the basic sciences, medicine, nursing, administration, pharmacy, public health, allied health fields plus education, clergy, judiciary and law enforcement.

We say, remarkable and wonderful! Perhaps we will be the vanguard in moving forward, in tangible and gratifying ways, the concept of total cooperation for the benefit of the public, and thus for all of us."

We're glad you are here.

Kermit G. Wedel, M.D.  
President, Kansas Medical Society

Lorne A. Phillips, Ph.D.  
Commissioner, Alcohol and Drug Abuse  
Services of Social and Rehabilitation Services

## ABOUT THE SPEAKERS . . . .

JACK DURELL, M.D.

Our distinguished Keynote Speaker, Dr. Jack Durell, is Associate Director of the National Institute on Drug Abuse and Director of the Office of Science. A native of New York City, Dr. Durell's 30 years of professional experience include work in prevention, intervention and treatment of alcohol and drug abuse; and biochemical, neurochemical and clinical psychopharmacological research.

Dr. Durell was Medical Director of the Psychiatric Institute, Washington, D.C.; Medical Director, Alcoholism Treatment Center, Psychiatric Institute; Executive Assistant to the Director and Acting Deputy Director, National Institute on Drug Abuse; and Acting Director, Division of Prevention and Treatment Development for NIDA.

His education and training include an undergraduate degree **summa cum laude** from Harvard, and his M.D. degree **cum laude** from Yale University Medical School.

Our Conference Moderator finds it simply unacceptable for young people to be robbed of their zest for life through alcohol/drug abuse. As a practicing Child Psychiatrist, Dr. Davis regularly sees the devastation which the use of illicit drugs by adolescents can wreak upon families. Because of his concern in this area, he has been active in numerous activities aimed at the prevention of alcohol/drug abuse. He was instrumental in organizing and presenting the Regional Conference on Marijuana in Kansas City last September.

Dr. Rich Davis received his medical education at the University of Kansas School of Medicine, graduating in 1954. His specialty is Family and Child Psychiatry. Aside from his medical career, Dr. Davis is a poet and author. He currently serves as Chairman of the Board of K.C. Masterpiece Products, Inc.

RICHARD E. DAVIS, M.D.

This Conference is the result of Dr. Wedel's aim to give Kansas a statewide conference where professionals from many different areas can join forces in combatting the nation's Number 1 health problem.

A native Kansan, Dr. Wedel was born in McPherson in 1932. He was graduated from the University of Kansas School of Medicine and served his internship at Wesley Hospital, Wichita. Dr. Wedel is Board certified and is in Family Practice in Minneapolis with his twin brother.

Dr. Wedel is active in church and community affairs, and his involvement in organized medicine is also extensive. He currently serves as President of the Kansas Medical Society and as Alternate Delegate from Kansas to the American Medical Association.

KERMIT G. WEDEL, M.D.

LORNE A. PHILLIPS, PH.D.

Previously Director of Provincial Programs for the Alcoholism Foundation and Director of Senior Management Advisory Group in Manitoba, Dr. Phillips became Commissioner of Alcohol and Drug Abuse Services, Department of Social and Rehabilitation Services, Kansas in 1979. In this capacity, he directs long range social planning for alcohol and drug abuse programming in Kansas.

Although a native Canadian, Dr. Phillips received his undergraduate degree from Oklahoma State University, and his Ph.D. from Washington State University.

Commissioner Phillips' professional experiences include alcohol and drug abuse administration, prevention, intervention, treatment, teaching and research. He was Senior Editor of *Core Knowledge*, a 12-volume work on alcohol drug abuse. He is a member of the Board of the National Association of State Alcohol and Drug Abuse Directors. Dr. Phillips prides himself of his gourmet cookery skills and enjoys talking about racquetball.

A long-time member of the Kansas Medical Society, Dr. Penn pioneered the KMS Impaired Physicians Program and served as its first chairman. Prior to his present position of Building Chief of the Colmery-O'Neil VA Center, Dr. Penn was associated with the Menninger Foundation as Section Chief of the Long Term Psychiatric Unit, and Director of Admissions to the Adult Hospital.

Born in Orange, New Jersey in 1930, Dr. Penn graduated from the University of Galveston School of Medicine in 1958. He served his psychiatric internship and the first year of residency with the John Sealy Hospital, Galveston. The residency was completed with the University of Texas School of Medicine at Austin.

He serves in consultative capacity to alcohol/drug abuse programs.

Dr. Penn will present a historical perspective with respect to public vs individual attitudes concerning alcohol/other drugs use/abuse. He will trace the trends of human behavior, past and future, and will address the question of seeming contradictions in individual attitudes.

GEORGE M. PENN, M.D.

D. I. MacDONALD, M.D.

As a practicing pediatrician, Dr. "Mac" MacDonald has seen enough marijuana use in children to develop the symptoms of abuse into a definable syndrome. He authored the book, *The Clinical Syndrome of Adolescent Drug Abuse*. In 1980, he became Director of Clinical Research for STRAIGHT, Inc., an adolescent treatment program. He also serves on the Board of Directors, National Federation of Parents for Drug Free Youth.

A graduate of Williams College (Mass.), Dr. MacDonald received his M.D. degree from Temple University School of Medicine. He is certified by American Board of Pediatrics and is a fellow in American Academy of Pediatrics. Besides serving as President of the Florida Pediatric Association, he is a member of the Drug Abuse Committee, Florida Medical Association.

It is the goal of Dr. MacDonald to help increase awareness of the epidemic of drug abuse among a variety of groups and audiences.

A Minnesota native, Dr. Leipold is President of Valley Hope Association headquartered in Norton, Kansas. It has been at his direction that the Association has grown to five inpatient and three outpatient treatment programs spread over four states: Kansas, Missouri, Oklahoma and Nebraska.

Dr. Leipold received his Ph.D. degree from the University of North Dakota. He was the 1982 recipient of an honorary degree of Doctor of Humanitarian Science from Benedictine College, Atchison.

In addition to publishing numerous research articles, Dr. Leipold authored a book on alcoholism, *Walk Through the Valley*. He is a member of the American Kansas Psychological Associations and Past President of the Kansas Rehabilitation Association.

WILLIAM LEIPOLD, PH.D.

DAVID E. SMITH, M.D.

In 1967, at the height of the "hippie" culture, Dr. Smith founded and became Medical Director of the Haight-Ashbury Free Medical Clinic in San Francisco. Although the Haight-Ashbury as it was known then no longer exists, the health care system Dr. Smith started continues to grow. His clinic, beginning in a 7-room flat off Haight Street, now occupies 5 Victorian houses, has 60 salaried staff and 400 volunteers. Most of the work still involves drug detoxification, but the clinic also operates a general medical facility and a psychiatric care program for prison inmates.

Dr. Smith received his M.D. degree in 1964 from the University of California School of Medicine, San Francisco, where he also obtained a post-doctoral fellowship in Pharmacology and Toxicology in 1967. His specialty is Clinical Pharmacology. He serves extensively as consultant on drug abuse and as lecturer. Dr. Smith is founder and editor of the *Journal of Psychedelic Drugs*, and a member of the editorial board of both *The Journal* and *Clinical Toxicology*.

# CONFERENCE AGENDA

Wednesday, April 13

8:00 Registration and Continental Breakfast

9:00 WELCOME - Kermit G. Wedel, M.D.  
Introduction - Richard E. Davis, M.D.  
Keynote: WELLNESS vs ABUSE - Jack Durell, M.D.

10:00 Stretch Break

10:10 ATTITUDES IN U.S. TOWARD ALCOHOL AND DRUGS  
George M. Penn, M.D.

11:00 THE ROLE OF MEDIA IN THE PREVENTION OF  
ALCOHOL AND OTHER DRUG ABUSE

Moderator: Bill Miller  
Panel:

Tony Jewell, Harris Rayl, Lynn Higbee, Bob Kearns, Marty  
Donsky.

12:00 LUNCH

Presiding: Nancy (Mrs. James E.) Roderick, Salina Citizens  
Coalition on Alcohol and Drug Abuse  
Welcome: Mayor, Keith Duckers  
Ann Knowles, Director, Convention and Visitors Bureau, Salina

1:00 A PEDIATRICIAN LOOKS AT DRUG ABUSE  
PREVENTION

Donald Ian MacDonald, M.D.

2:15 - 3:30 - ELECTIVE WORKSHOPS

1. Drinking and Driving in Kansas  
Hon. Herbert Rohleder
2. The Role of the Professional in Prevention  
Donald I. MacDonald, M.D.
3. School Team Approach in Prevention  
Galen Davis, Joan Hearne, John Morton, Ed.D.

4. Showcasing a K-12 Model Curriculum - Here  
Looking at You Two  
Clay Roberts, M.P.H.

5. Positive Self-Concept  
Gwen Briscoe, L.C.S.W.

6. Drug Issues for Older Citizens

Moderator: Gary Petz

Panel:

Anol W. Beahrn, M.D., Dave Domann, R.Ph., Lois Nixon  
Sprague, Doris Stout

3:30 BREAK

3:45 - 5:00 - ELECTIVE WORKSHOPS

7. Recognizing Street Drugs

Et. Robert Mermis

8. Wellness - A Total Approach

Virginia Lockhart, M.P.H., Jenny Ransom, M.A.

9. Peer Programs in Schools

Clay Roberts, M.P.H.

10. Attitudes of the Professionals

George M. Penn, M.D., Edna Mae Evans, R.N.

11. The Use and Misuse of Psychoactive Drugs in

Treating Substance Abuse

Michael Fusillo, M.D.

5:00 NAB RECEPTION AND EXHIBITS

FONZ AND FRIENDS - Puppet Show - KS Medical Society Aux.  
(Dinner on own)

Pizza - Salina Citizens Coalition Fund Raiser

7:30-12. Demonstration of Resources -

AA, NA, Alanon, Naranon

There will be a number of mini-presentations with speakers  
sharing their experience, strength and hope.

13. Film Festival

Thursday, April 14

7:00 FUN RUN

Starting from the main entrance of the Bicentennial Center

7:30 KS. CHAPTER NAT'L ASSN. OF PREVENTION  
PROFESSIONALS

7:45 Registration and Continental Breakfast

8:30 INTERVENTION: IDENTIFYING, CONFRONTING,  
and REFERRING

David E. Smith, M.D.

9:30 BREAK

9:45 ALCOHOL AND OTHER DRUG ABUSE TREATMENT

William Leopold, Ph.D.

10:45 - 12:15 - ELECTIVE WORKSHOPS

14. Intervention and Treatment for Impaired Physi-  
cians and Nurses

David E. Smith, Millicent E. Buxton, M.A.

15. The Process of Abuse

David L. Trudeau, M.D.

16. Student Assistance Programs - Helping the Student

Already in Trouble with Alcohol and Drug Abuse

Gwen Briscoe, L.C.S.W.

12:30 LUNCH *Dr. Smith*

*1:45 - 3:00*  
~~1:00 - 2:00~~

1:45 - 3:00 - ELECTIVE WORKSHOPS

17. Profiles of Children in Alcoholic Families

Moderator: Frances Strieby

Panel:

Sheila Boos, R.N., Tom Cliff, B.S., Jerry Eames, B.S.W.

18. Modalities of Treatment: Inpatient, Outpatient and  
Reintegration Programs

Moderator: C. L. "Lefty" Engebritson

Panel:

Glen Leonard, M.S., C.A.C., Kenneth Lemon, C.A.C.,  
A.M. "Gus" Wigus, M.A., Glen Rheas, Elaine M. Skoch, R.N.,  
M.N.

19. Tour St. John's Adolescent Treatment Program  
(Transportation provided)

20. Illegal Diversion of Legal Drugs

Bonnie E. Wilford

21. How to Involve the Family in Alcohol and Other  
Drug Treatment

Sue Little, L.S.W., C.A.C.

2:45 - BREAK

3:00 WRAP-UP

Lorne A. Phillips, Ph.D.

CEU CERTIFICATES AVAILABLE AT 3:30 p.m.

# A LOOK AT THE WORKSHOPS . . . .

## 1. DRINKING AND DRIVING IN KANSAS

A comprehensive look at the DUI problem in Kansas, and the efforts being taken to provide solutions.

## 2. THE ROLE OF THE PROFESSIONAL IN PREVENTION

A discussion of how professionals can most effectively use expertise in furthering prevention activities.

## 3. SCHOOL TEAM APPROACH IN PREVENTION

A look at the School Team Cluster Approach and how it has been realized in Wichita.

## 4. SHOWCASING A K-12 MODEL CURRICULUM

Here's Looking At You - An overview of a national K-12 Model Prevention Curriculum. Content includes review of a conceptual framework as well as demonstrating practical activities for classroom use at various grade levels. A review of a comparison teacher training program will also be presented.

## 5. POSITIVE SELF-CONCEPT

An experiential workshop that provides participants an opportunity to become more aware of the development of their sense of esteem, and how this self-perception affects attitude and action.

## 6. DRUG ISSUES FOR OLDER CITIZENS

A discussion of drug issues for older citizens from the perspective of a physician, a pharmacist, local prevention program director, and an ombudsman.

## 7. RECOGNIZING STREET DRUGS

A display of drugs and drug paraphernalia and a discussion of the law enforcement perspective of street drugs.

## 8. WELLNESS-A TOTAL APPROACH

A look at developing healthful lifestyles, and information on Project VOTE, the smoke avoidance policy process. There will also be information on How To Set Up A Wellness Program for Employers based on the Project PLUS and SRS Wellness Committee Models.

## 9. PEER PROGRAMS IN SCHOOLS

A presentation of a model peer program designed to help secondary students with a variety of health programs. The content will include a review of program objectives, selection process, training design and a discussion of follow-up and support efforts.

## 10. ATTITUDES OF THE PROFESSIONALS

A look at how the professionals' attitudes can affect positive changes.

## 11. THE USE AND MISUSE OF PSYCHOACTIVE DRUGS IN TREATING SUBSTANCE ABUSERS

General overview of diagnostic issues involved prior to prescription of a psychoactive drug in a substance abuser. Examples will be provided of subgroups of substance abusers who could benefit from psychoactive drugs.

## 12. DEMONSTRATION OF RESOURCES

A number of mini-presentations with speakers from AA, NA, Alanon and Naranon sharing their experience, strength and hope.

## 13. FILM FESTIVAL

See list of scheduled films in your Conference Packet.

## 14. INTERVENTION AND TREATMENT FOR IMPAIRED PHYSICIANS AND NURSES

A discussion of the latest development in diagnosis, intervention and treatment of physicians and nurses with substance abuse.

## 15. THE PROCESS OF ABUSE

Information for Professionals who wish to improve their intervention skills with substance abusers.

## 16. STUDENT ASSISTANCE PROGRAMS-HELPING THE STUDENT ALREADY IN TROUBLE WITH ALCOHOL AND DRUG ABUSE

An approach to early intervention based on an employee assistance program model. This program uses professional counselors to provide alcohol and drug abuse intervention and prevention services for high school students. The cost and mechanics of setting up a Student Assistance Program will be covered.

## 17. PROFILES OF CHILDREN IN ALCOHOLIC FAMILIES

A discussion of characteristics commonly exhibited by children in alcoholic families and possible techniques for referral.

## 18. MODALITIES OF TREATMENT

Inpatient, Outpatient and Reintegration Programs - A definition of the different treatment modalities and how they relate.

## 19. TOUR OF ST. JOHN'S ADOLESCENT TREATMENT PROGRAM

Transportation provided.

## 20. ILLEGAL DIVERSION OF LEGAL DRUGS

A discussion of the ways prescription medications are diverted into the criminal market and AMA's inter-organizational efforts to curtail prescription drug abuse.

## 21. HOW TO INVOLVE THE FAMILY IN ALCOHOL AND OTHER DRUG ABUSE TREATMENT

A dialogue of the importance of involving the family in alcohol and drug treatment and methods for how this can be accomplished.

# CONTINUING EDUCATION

"As an organization accredited for continuing medical education, the Salina Health Education Foundation certifies that this continuing medical education activity meets the criteria for 12 credit hours in Category I of the Physician's Recognition Award of the American Medical Association."

"This program has been approved for 12 hours (1.2 CEU) of Continuing Education by the Kansas Pharmacists Association, program 683-131-83-01."

Program acceptable for 12 prescribed hours by the American Academy of Family Physicians.

Kansas Psychological Society - approved 12 Contact Hrs.

Kansas State Board of Nursing - approved 12 Contact Hrs.

Kansas Alcoholism Counselors Association - approved 12 Contact Hrs.

Kansas Association for Drug Abuse Counselors - approved 12 Contact Hrs.

Behavioral Sciences Board-Social Workers approved for 13 Contact Hrs.

STATE OF CONNECTICUT  
CONNECTICUT ALCOHOL AND DRUG ABUSE COMMISSION

July 1, 1983

Ms. Bonnie B. Wilford  
American Medical Association  
535 North Dearborn Street  
Chicago, Illinois 60610

Dear Bonnie:

Re: Prescription Drug Abuse

I am disappointed that because of a conflict in schedule I will be unable to attend the next meeting of the Steering Committee set for Thursday, July 21.

We have been moving ahead steadily in planning for our Connecticut Prescription Drug Conference now tentatively scheduled for March, 1984. Our conference organizing task force is chaired by an M.D., who represents the State Medical Society. The remaining members are myself, representatives from the Drug Control Division, State Department of Consumer Protection, a representative from the Medical Assurance Division, State Department of Health Services, and representatives from the Connecticut Pharmaceutical Association.

Areas that we expect to address at our next meeting scheduled for the end of July are:

1. Define the purpose of the conference and the anticipated results.
2. Develop our tentative program based on our review of other state conferences and the identified needs in our state.
3. Review the survey instrument used by the State of Missouri, make necessary adjustments and identify proper mailing list.
4. Review cost estimates received from four possible conference sites.
5. Identify date for completion and distribution of planning procedure announcing the conference.
6. Schedule meeting of a larger planning group representing

**cadac**

999 Asylum Avenue, Hartford, Ct. 06105

The Commission is an independent agency attached to the Department of Mental Health for administrative purposes only. An Equal Opportunity/Affirmative Action Employer

July 1, 1983

other applicable associations for their input and their buy-in to the conference.

We really appreciate the information that you have provided us thus far and look forward to some feedback shortly after the July 21 meeting.

Sincerely,

  
Robert B. Savage  
Assistant to the Executive Director

 Jefferson City, MO 65102  
 phone 751-4942

August 10, 1983

'AUG 15 1983  
 HEALTH & HUMAN BEHAVIOR PROGRAM

TO: Task Force on Misuse, Abuse and  
 Diversion of Prescription Drugs

FROM: *Ernie Sjoblom* Sjoblom, Chairman

Meeting Notice

The next regularly scheduled quarterly meeting of the Task Force will be held at 12:00 Noon, Thursday, September 15, 1983, at the Missouri Association of Osteopathic Physicians and Surgeons (MAOPS) office, 1423 Randy Lane, Jefferson City.

The Task Force will experiment with this noon meeting, rather than the customary late afternoon, to determine if such timing facilitates participation by non-Jefferson City based members.

A light lunch will be available at a nominal charge.

A reminder notice and agenda will be sent to you about two weeks before the September 15 meeting.

Recent Task Force Activities

Task Force Executive Committee has continued its monthly meetings throughout the summer. Program committees have also been meeting.

(1) Enclosed are various items which may be of interest to you;

- July 26, 1983 letter from A.M.A., with comments on the Missouri effort;
- Copy of solicitation letter which has been sent to seventy pharmaceutical firms servicing Missouri;
- An updated Task Force Membership List (you will note that new members have been added and that inactive members have been shifted to "To receive correspondence" status);
- Copies of four related articles from professional or trade journals.

Task Force on Misuse, Abuse and  
Diversion of Prescription Drugs  
August 10, 1983  
Page Two

- (2) July 20-21, 1983 meeting of A.M.A. Steering Committee on Prescription Drug Abuse. Members Ernie Sjoblom and Ed Corcoran attended the meeting held in Washington, D.C.
- (3) R. B. Wilson (Director of Missouri Division of Alcohol and Drug Abuse) was invited to serve as consultant to a pre-conference planning session held by Oregon officials preparing for their upcoming state conference on prescription drug abuse.
- (4) At the invitation of professional leadership from southeast Missouri, tentative discussions have been held relative to a "mini" conference for the Bootheel Area. The Task Force has held from the outset that the 1982 Statewide Conference should be followed up with appropriate regional conferences - hopefully in St. Louis, Kansas City, and several other sites.
- (5) The Education Committee (Chairperson is Doug Viehland) is rapidly developing plans for 1983-84 Professional Awareness Program. Doug will present full description of the program during the September Task Force meeting.

Missouri related pharmaceutical firms are being solicited (enclosed letter) for donations to off-set the cost of the program.

- (6) 1984 Legislation and Rescheduling Issues. The Executive Committee has devoted time during several recent meetings to discussion of various recommendations for legislation (for introduction in 1984) and changes in Missouri's prescription drug schedule.

The item with most agreement seems to be that of re-scheduling the so-called "exempt cough remedies" from V to IV. By this move, the often abused codeine containing cough/cold medications would require a physician's prescription. It's the belief of the Task Force that there is an ample availability of non-codeine preparations and that the re-scheduling would not cause a hardship.

Legislation and re-scheduling are to be major agenda items during the September meeting. If there are related issues or concerns you want to have considered, please feel free to offer your suggestions.

Hope your schedule will allow for your participation on September 15. We're looking forward to seeing you then.

**Diversion of Prescription Drugs**

TO: Pharmaceutical Manufacturers Association  
FROM: Missouri Task Force on Misuse, Abuse and  
Diversion of Prescription Drugs

The enclosed letter will soon be sent to seventy-five pharmaceutical manufacturers serving Missouri. As you will see, this is a solicitation for financial support for an upcoming Task Force program.

It is our hope that by requesting relatively small donations (\$50 to \$100) it will be possible for most firms to respond.

The Task Force program, for which the financial support is being requested, is a new Professional Awareness initiative, designed to focus attention on means used to deceive prescribers and dispensers. The program format is rather simple and uncomplicated. We plan to have a group of presenters, from various sections of the state, trained and oriented to the objectives of the program. From this "pool," we will be able to provide presenters, upon request, to meetings of local professional societies (medical, osteopathic, dental, pharmaceutical, veterinarian, podiatry, nursing) or to hospital staff training programs. In some instances, state associations will use presentation as part of their next annual meeting.

Presenters will include volunteers, recruited by cooperating state professional associations and certain appropriate law enforcement and regulatory officials. Task Force staff will organize and coordinate requests for programs from local societies. As the program is scheduled on a full year, we hope that many local societies will be able to use this opportunity.

Efforts are being made by the cooperating professional associations to allow CE credit for those professionals attending local meetings.

If there is anyway that P.M.A. could support this program, and our solicitation, we would very much appreciate your help. Perhaps you could provide a letter of endorsement and/or encouragement, which could be copied and included in our solicitation mailing.

If you need additional information, please feel free to contact Ed Corcoran, Missouri Division of Alcohol and Drug Abuse, 2002 Missouri Boulevard, Jefferson City, Missouri 65101, (314/751-4942).

Thank you.

Jefferson City, MO 65102  
phone 751-4942

Dear

We know that you are constantly being asked to support projects sponsored by professional groups. This request, however, may be unique.

The Missouri Task Force on Misuse, Abuse and Diversion of Prescription Drugs (membership list enclosed) is developing a continuing education program for health care professionals. This program will focus on ways these professionals may be deceived into inappropriate prescribing or dispensing of prescription drugs for non-medical use.

The Task Force program, scheduled to begin during the Fall of 1983, will be delivered by professionals from the cooperating professional associations, as well as law enforcement officials and, possibly, by persons who have actually obtained prescription drugs in this manner. All of the program presenters will be volunteering their time and service.

The program will be presented to local professional societies, hospital staff meetings, annual meetings of state associations, and to other settings throughout Missouri. For these presentations to be as well planned and meaningful as possible, it is important for a single-day training session to be conducted and that some expenses are provided for the volunteer presenters who will be receiving this training.

We are asking your support to help off-set the cost of the training session and subsequent series of specific programs. A donation of \$50 to \$100 will be very much appreciated and will be credited in a special resource manual being developed, which will be distributed throughout Missouri. Even if your company does not market the type of pharmaceuticals most frequently diverted, it may be important for the health care professionals attending these programs to know of your concern and support.

By your support of our efforts, you will be indicating to the health care professional community and the general public you desire to support efforts to curb the misuse and abuse of prescription drugs. We will be providing five complimentary copies to each contributor.

If we can help, please send your check to:

Task Force  
PO Box 687  
Jefferson City, MO 65102

made payable to "E & R Trust--Missouri Hospital Association."

**Voluntary Coalition of Professional Health Care Associations, Licensing Boards,  
Law Enforcement Agencies, State Agencies and Industry**

A member of the Task Force will call you in the next few weeks to answer any questions you may have or to provide additional information you may need.
